

**Know what's below.
Call before you dig.**

CALL BEFORE YOU DIG

IT'S THE LAW..... AND IT'S FREE

CALL FIRST

- Underground utilities exist everywhere, even in your yard. Whether you are a homeowner or excavation contractor, digging without knowing where it's safe to dig can cause tremendous damage and even loss of lives. Installing sprinklers or even planting a tree can be extremely dangerous if you strike a gas line.
 - We want to keep things safe for you and your neighbors.
 - We will come to your excavation site within two (2) business days of your request to mark underground Intermountain Gas lines with yellow paint or stakes. . . and it's free.
 - Once marked, it is a good practice to carefully expose the line(s), by hand digging, to pinpoint their location.
-

NATURAL GAS LINE

If you don't call, you become responsible for the legal, financial and safety consequences resulting from damage to utility lines.... So let's work together to keep things safe. Just call Digline at:

811

In the Boise area or

811

in all other cities in Southern Idaho

(These numbers are also listed in your directory under Intermountain Gas Company)

Not only could it save your life, it's the law. Remember, call before you dig.

Our service is free, simple and fast. A few minutes now for a phone call may save you time, inconvenience and money.

If you are constructing a permanent building, be sure the existing natural gas line will not be located underneath the new structure. If this possibility exists, please call Intermountain Gas Company to explore options available.

CALL FIRST

A toll-free service allows contractors, excavators, and homeowners in the State to call

“DIGLINE”

and arrange for location of underground facilities.

**YOUR CALL MUST BE AT LEAST
TWO (2) WORKING DAYS PRIOR
TO SCHEDULED WORK**

TO ARRANGE FOR LOCATIONS, CALL:

Boise / Nampa Calling Area
811

All Other Cities in the Southern Idaho
811

THANK YOU FOR YOUR HELP IN PROTECTING UNDERGROUND FACILITIES
